Cabinet fans for smoke extraction certified F400-120. Cabinet fans manufactured from galvanised sheet steel and protected against corrosion.
Internally lined with 7 mm thickness of melamine acoustic foam insulation (M1).
All models are fitted with forward curved centrifugal impellers.

Motors
All motors are IP55, class F insulation.
Available, depending upon the model, with three phase motors in 4 or 6 poles.
Electrical suply:
Three phase 230/400V-50Hz, up to 3 kW.
400V-50Hz, for higher motor powers.
(See characteristichs chart).

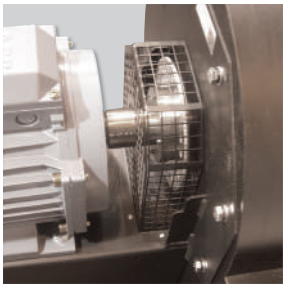
On request
Two speed motors.

Specific applications

F400-120
Officially approved to EN12101-3 standard

300°C
Continuous

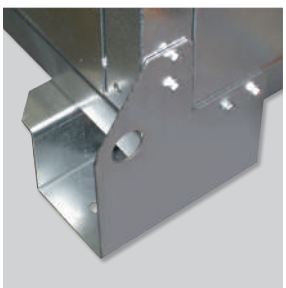
P
Car parks



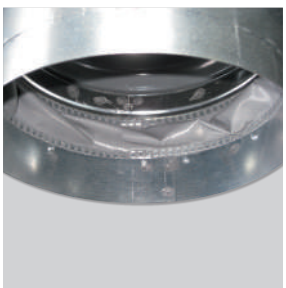
Standard motor with cooling wheel
Standard motor heat removal system ensures extraction of high temperature air stream.

Impeller dynamically balanced
Impeller dynamically balanced, according to ISO 1940 standard, providing vibration free operation.

Low noise level
Acoustic insulation of 7 mm thickness flame retardant (M1) melamine foam reducing the noise level significantly.



Easy to install
The cabinets have fixing points on the corners easing the installation either on the floor or ceiling.



Flexible coupling at the discharge and inlet
To reduce vibration and noise transmissions to the installations.

TECHNICAL CHARACTERISTICS

Before installation check that the product electrical characteristics listed on the data plate label (voltage, power, frequency, etc.) match those of the intended electrical supply.

Model	Speed (rpm)	Maximum absorved power (W)	Maximum absorbed current (A)		Maximum airflow (m^3/h)	Sound pressure level* (dB(A))
			230V	400V

PERFORMANCE CURVES

- q_v: Airflow in m^3/h and m^3/s.
- p_{sf}: Static pressure in mmWG and Pa.
- Dry air at 20ºC and 760 mmHg.
- Performance data in accordance with ISO 5801 and AMCA 210-99 Standards.
